# **PROTERRACE** ECO DRIP

VARNISHED/COATED ALUMINIUM

PROTERRACE ECO DRIP is an edging profile in aluminium designed to protect the front of the screed from water penetration and the edges of the tiles laid on terraces and balconies. The profile is equipped with a punched flange that ensures its fixing to the support. The front the profile is equipped with a double drip to improve the push away of water from the wall.

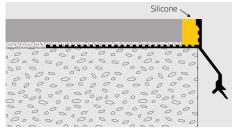

PROTERRACE DRAIN DRIP is an edging profile in varnished aluminium, designed to protect the edges of the tiles on

terraces and balconies and to allow the downflow of water. The profile is provided with a flange that ensures the right fixing

and an adhesive stripe in open cells polyurethane, which protect the outflow holes to be closed by silicone.

# PTEDP ..

#### **EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS**

1. Choose "PROTERRACE ECO DRIP" according to the tile thickness. 2. Cut "PROTERRACE ECO DRIP" to the desired length and fix it to the support with nails. 3. Apply the desired waterproofing system, sealing the joint between profile and waterproofing. **4.** Lay the tiles, leaving about 5 mm between tiles and profile. **5.** Seal the space between tiles and profile using PROBAND FIX.
