PROSHOWER BASE L is a channel body in stainless steel AISI 304/1.4301 - V2A steel for the realisation of floor-level shower. The body channel, with an overall height of 85 mm, is completed by 6 different grids in stainless steel. PROSHOWER BASE L undergoes electro-polishing and subsequent passivation, which guarantees excellent resistance in any environment. Its low thickness combined with the fully adjustable siphon, the modularity and the high number of grids make it a much sought-after solution.

PROSHOWER PROFILE GLASS

SATINED STAINLESS STEEL AISI 304 / 1.4301 - V2A

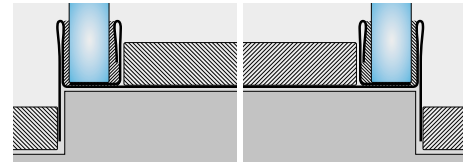

PROSHOWER PROFILE GLASS Suitable profile for fixing glass slabs in case of floor level showers with a slope of 2%. Due to its particular shape and finish in satin-finish stainless steel AISI 304 / 1.4301 - V2A, it covers and decorates the visible side of the screed.

PROSHOWER PROFILES GLASS IN SATINED STAINLESS STEEL AISI 304/1.4301-V2A - degreased and passivated thermo packed

PSHWPGACS 200SX	Proshower profile glass satined stainless steel lt L 200 cm	1	169,90

EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS

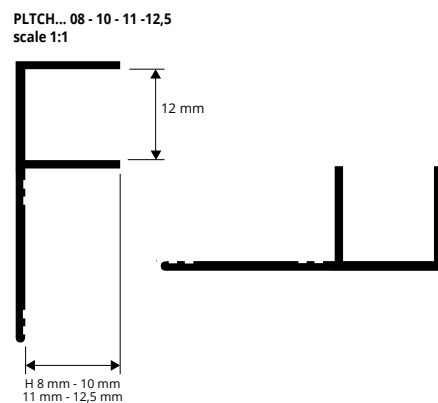

1. Choose "PROSHOWER PROFILE GLASS" according to the desired length. 2. Cut "PROSHOWER PROFILE GLASS" to the desired length and apply the adhesive on the support where the profile will be laid. 3. Press the anchoring flange of "PROJOLLY SQUARE" into the adhesive. 4. Lay the tiles, aligning them with the profile leaving a 2 mm joint. Remove immediately all remains of adhesive from the surface of the profile. 5. Fill the joints between the profile and the tiles with grout, in order to avoid water stagnation. Remove immediately all the remains of grout from the surface of the profile. 6. Insert the sheet of glass and seal

PROLISTEL CHANNEL

ANODIZED AND POLISHED ALUMINIUM

PROLISTEL CHANNEL is a F-shaped strip in anodized and polished aluminum suitable to decorate the wall coverings in ceramic tiles and natural stones. Its section allows the realization of a decorative joint which can also be used as a guide for the fixing of sheets of glass on floors and walls. Its particular section and the availability in two different finishes make **PROLISTEL CHANNEL** a much sought-after profile that allows an easy workmanlike application.

PROSHOWER PROFILE WALL

PROFOIL

ROLLS IN HDPE AND PP

PROFOIL is a waterproofing polyethylene membrane with nonwoven polypropylene fabric on both side that guarantees high adhesion to the support.

ROLLS IN HDPE AND PP - Thickness 0,42 mm

Article	Width roll H x L m	total m ²	€/m ²	€/Roll
PFLO 0430	1 x 30	30	11,48	344,40
PFLO 0405	1 x 5	5	15,97	79,85

AREAS OF USE

• **Use.** Waterproofing of substrates and vertical structures before the laying of ceramic and stone materials in areas subject to occasional contact with water like bathrooms and kitchens, with high vapor pressure like saunas and Turkish baths and with permanent contact with water also in pressure like swimming pools and tanks. On screed without cracks and completely cured, old ceramic floors and natural stones anchored to the substrate, concrete completely cured and wood supports.

• **Don't use.** On bituminous coverings, over insulating panels and lightweight screed.

WARNINGS

Store in a cool and dry place avoiding direct sunlight and sources of heat. Read the data sheet before applying; in case of special applications please call the technical department.

PROFOIL PASTE

WATERPROOFING ELASTIC MEMBRANE

PROFOIL PASTE is a ready to use thin-layer waterproofing elastic membrane with low emissions of volatile organic compounds.
