1. Fix the support on the wall putting the screws and glue every 50 cm (recommended). Make a test with "PROSKIRTING LED" in order to value the height and the correct position of supports. 2. Fix in the chosen spaces the socket/ power supply box basis, switch box basis and, eventually, the junction box. 3. Connect 220V supply to power/ transformer unit, and afterwards, connect the "PROSKIRTING LED" bar next to power unit. 4. Connect the pre-applied led bars inside the "PROSKIRTING LED" with the supplied cables/ wires in continuous way. 5. The power supply unit guarantees about 15 lm of led illumination, beyond that distance it is necessary to add another power supply box/socket. When fixing without support, clean the surface carefully so that it's dry and with no grass trace, apply the silicone on the knurled sides of the profile and lay down correctly, pressing uniformly and with no hammering. For the application of "PROSKIRTING LED" with adhesive, we recommend the temperature not below 15°.

# PROSKIRTING

ANODIZED SILVER ALUMINIUM

PROSKIRTING is an innovative patented "cable channel" skirting in anodized aluminium. Studied and designed to resolve various problems related to the installation of skirting and to the laying of electrical, computer and telephone cables and other service systems. PROSKIRTING has been designed to offer a dual function: 1- PROSKIRTING complete PKAA 80 is a snap-on inspectable skirting consisting of a support PKGS 66 to be screwed to the wall and the visible profile PROSKIRTING PKAA 80. 2- PROSKIRTING PKAA 80 is the visible skirting profile to be fixed directly with silicone/adhesive. It is not inspectable like PROSKIRTING complete; it is also available in a self-adhesive version (PKAA 80A).

PROSKIRTING SHELL is an innovative aluminium skirting board, with 70mm height, in silver anodized finish. The skirting board can be fixed to the wall with silicone or screwed to 20mm long aluminium punched flanges, that have to be fastened to the wall at 50cm distance from each other. It allows to cover up to 25mm high perimeter edges. Moreover the version with punched flanges allows the housing of low tension electrical cables, such as internet, phone, TV and satellite cables and can be easily inspected. The optional completing pieces, such as inside/outside corners, linking elements and end caps make PROSKIRTING SHELL easy to install and guarantee a practical and elegant end result.

EXAMPLES OF LAYING

**LAYING INSTRUCTIONS**  
 1. Choose the "SKIRTING 80" also choose with or without adhesive. 2. Cut the profile to the required length, taking care to calculate the width of the inside-external corner joints. 3. For the self-adhesive version, the surface must be smooth, grease-free and not porous. It is not recommended for plaster and mortar surfaces (version without adhesive is better, using fast-setting acrylic silicone which is suitable for fixing aluminium to mortar - plaster, etc.). 4. Use the corner linking elements-joints and right and left end caps to facilitate laying.

IN 6 COLOURS

SKIRTING 62F is a new 62 mm skirting board made of non-toxic, flexible vinyl resin. This profile is very resistant and particularly suited for providing highly aesthetic perimeter skirting of excellent quality at reasonable prices. It differs from the BTPV... 60 skirting board in that it is provided with a bottom flange that allows it to be placed perpendicularly (90°) to the wall/lining and welded to PVC floors. In addition, the horizontal flange covers the floor's perimeter expansion joint. We recommend applying the skirting using glue/adhesive/Bostik/mastic. Alternatively, you can choose the self-adhesive version for quick, effortless installation.
